

WHAT IS TLS WEIGHT MANAGEMENT SOLUTION?

TLS Weight Management Solution will teach you about low-glycaemic-impact eating and how to identify new favourite foods, create new, healthy behaviours, and improve body composition to get your metabolism operating in high gear. Plus, with the help of scientifically formulated TLS supplements, you'll *find your fit* in no time.

WHY TLS WEIGHT MANAGEMENT SOLUTION?

Most weight management programs tell you what to eat, but often fall short as a lifetime solution because they fail to address the REASON why you may be overeating, under exercising and/or making unhealthy choices.

A weight management plan only works if you stay with it. And as any successful dieter can tell you, it's much easier to lose weight and firm up when the plan you choose fits your lifestyle and personality.

With any endeavour to lose weight, most people think they need to go on a diet. But that's not exactly true. A diet is simply what you eat, which means you're already on one. That diet either works for you so you achieve and maintain the weight loss you want, or it doesn't.

REGARDLESS OF YOUR GOALS,
COMMITMENT LEVEL OR YOUR BODY'S
PERSONAL NEEDS, TLS WEIGHT MANAGEMENT
SOLUTION CAN WORK FOR YOU.

TLS is a program designed around you, your goals, and your commitment level to achieving your personal health and fitness goals. It's not a one-size-fits-all program that tells you to "just eat this and not that" or "do this and don't do that." TLS is customised to you, the individual, and designed to keep you on track to achieve your personal weight management goals and maintain a healthy lifestyle.

FIND YOUR FIT

Each plan in the TLS Profiling System begins with an optional four- to seven-day detox that promotes full-body cleansing, while priming your metabolism for weight management. From there, you can choose from five specially designed, low-glycaemic menu plans that will fit your body's nutritional requirements, as well as your goals, personality and commitment level.

WHY LOW GLYCAEMIC?

Low-glycaemic foods like lean proteins, high-fibre vegetables, fruits, beans and legumes, quality fats and whole grains help keep blood sugar levels stable. When you have stable blood sugar levels, this will help keep your body balanced and help improve energy, sleep, how you react to stress and, most importantly, will help you burn fat instead of store it. Low-glycaemic eating has also been shown to be superior for weight loss and weight management, cardiovascular health and more.

HOW IT WORKS

BODY COMPOSITION

Traditional diets focus solely on the number on the scale, and more of the weight reduction you experience often comes from water and muscle loss. TLS Weight Management Solution, however, focuses on loss of body fat. TLS Weight Management Solution emphasises achieving healthy body composition by increasing the ratio of muscle to fat, because muscle dictates metabolism. To obtain a healthy body composition, TLS Weight Management Solution emphasises the importance of combining low-glycaemic eating with exercise.

BEHAVIOUR MODIFICATION

For any weight management program to succeed, change must occur. Change usually requires you to overcome fear. Once you do, your life changes for the better. TLS Weight Management Solution makes it a point to address this very important aspect of success to ensure past mistakes are not repeated. Small, manageable changes lead to long-lasting results.

SUPPLEMENTATION

TLS Weight Management Solution provides scientifically developed weight management supplements designed to support your weight management efforts. Each formula addresses different processes in your body that cause you to gain weight or hinder your weight management efforts.** TLS supplements are designed to work synergistically, and au.tlsSlim.com will recommend a custom regimen based on a brief questionnaire to maximise your success with TLS Weight Management Solution.

*Consult your physician before beginning any new exercise program.
